SUMMARY

I am a detail-oriented software developer with a passion for building responsive and user-friendly web applications. With proficiency in HTML, CSS, Java, and Python, I have successfully developed several projects, including an e-commerce platform and a music recommendation system. I constantly seek to enhance my skills and deliver high-quality solutions that meet user needs.

SKILLS

Bootstrap	CSS	ECommerce	HTML
Java	JavaScript	ML Algorithms	Python

PROJECTS

Amazon Clone

Technologies: HTML, CSS, JavaScript, Font Awesome
Project: Amazon-Inspired E-commerce Frontend
Designed a responsive, user-friendly UI with structured Navigation,product listings, and footer.
Implemented hover effects, styled search/sign-in forms, and optimized images for performance.
Focused on intuitive UX using modern front-end techniques.

Music Prediction System using Machine Learning

Built a music recommendation model using Python and ML algorithms.Implemented filtering techniques to improve accuracy.

CERTIFICATIONS

Java virtual internship by eduskills.

Java virtual internship focused on enhancing java programming skills

Web development by internshala.

Comprehensive course covering various aspects of web development

KEY ACHIEVEMENTS

- ▣ **E-commerce Platform Creation**
Developed Amazon Clone with 100+ products.
- ▣ **Music Recommendation Model**
Achieved 85% accuracy in music prediction.
- ▣ **Java Internship Excellence**
Completed Java internship with 95% score.
- ▣ **Web Performance Optimization**
Increased web load speed by 30% through optimization.
